GENERAL INFORMATION

SIMPLWINDOWS NAME:	CMS Privacy Interface
CATEGORY:	CMS
VERSION:	v2b
SUMMARY:	Privacy button interface
GENERAL NOTES:	This module interfaces between privacy button on touchpanel and audio conference and videoconference controls to enable/disable privacy functions. Also ties to videoconference module for true feedback.

CONTROL:

Enable{Sys-Pwr}	D	Hold high to enable module. When used with CMS project, tie to system power status.
Force-Privacy-On/Off	D	Pulse to force privacy state on/off
Privacy-Btn	D	Tie to privacy button signal from touchpanel
Codec-Privacy-On-FB	D	Tie to 'Privacy-On-FB' of codec to keep module status same as codec state

FEEDBACK:

Privacy-Animation	A	Provides animation value for privacy button in CMS templates (31 frames)
Privacy-Flash	D	Digital on/off pulse generated when privacy status on (1 second on/off)
Privacy-On/Off-Fb	D	Latched high indicating privacy status
Privacy-On/Off-Pulse	D	Pulse indicating privacy status. Used to trigger Audio and Videoconference modules to enable/disable privacy
